This Tariff List is published pursuant to nbn’s Special Access Undertaking (SAU), which is a regulatory undertaking given to the ACCC.

nbn is a wholesale and does not control prices charged by service providers. The wholesale prices in this document are exclusive of GST. References to speeds or bandwidth profiles in this document are not to end customer speeds; they are wholesale layer 2 peak information rate (PIR) bandwidth provided to retail providers unless stated otherwise. An end customer’s experience, including the speeds actually achieved over the nbn® network, depends on the nbn® network technology and configuration over which services are delivered to their premises, whether they are using the internet during the busy period, and some factors outside of NBN Co’s control (like their equipment quality, software, chosen broadband plan, signal reception, or how their provider designs its network). SAU Tariff List: 1 December 2023 to 30 June 2024

Introduction

This Tariff List is published pursuant to clauses 2B.2.3 and 2B.2.5(b) of **nbn**'s Special Access Undertaking (**SAU**), as varied on 17 October 2023. This Tariff List takes effect on and from 1 December 2023.

This Tariff List sets out Prices for each NBN Offer, Other Charge and other WAPC Charge Component, as well as CVC inclusions for each Bundled TC-4 Offer and Bundled TC-2 Offer. In this Tariff List, the Prices and CVC inclusions for FY24 correspond with the Prices and CVC inclusions for FY24 as stated in the SAU 3-year Roadmap published by **nbn** for the period 1 December 2023 to 30 June 2026.

Capitalised terms in this Tariff List have the meaning defined in the SAU as varied on 17 October 2023 unless stated otherwise.

Changes to this Tariff List

The SAU sets out specific circumstances in which **nbn** must update Prices and/or CVC inclusions in the Tariff List for a Financial Year. For example, the SAU requires **nbn** to update the Tariff List to reflect:

- the Price on introduction of a new offer;
- a change to the Price of a previously Zero-Priced offer made in accordance with the SAU;
- a Price change resulting from the exercise by the ACCC of certain powers under the SAU;
- a Price change resulting from the SAU restriction on TC-4 discounts;
- a determination by **nbn** to reduce the Bundled Offer Ceiling or Price of an existing offer in the Tariff List;
- the withdrawal of a Price for an existing offer; and
- an adjustment to CVC TC-4 inclusions made in accordance with the mechanism set out in the SAU.

nbn will publish a new Tariff List by 1 May 2024 for FY25. That Tariff List will be subject to the TC-4 Price Relativity Restriction in the SAU and may contain different Prices and CVC inclusions to those set out for FY25 in the Pricing Roadmap published on 1 November 2023 for the period 1 December 2023 to 30 June 2026, including where actual CPI and/or utilisation are different to the CPI and utilisation assumptions used in preparing that Pricing Roadmap.

- ¹ Additional Connectivity Virtual Circuit Offer (TC-4) charges apply for CVC TC-4 utilised in conjunction with each of these Bundled TC-4 Offers in excess of any CVC TC-4 inclusion which is part of that Bundled TC-4 Offer (where the utilisation relative to the inclusion is determined on a per-AVC TC-4 Product Component basis).
- ² The SAU states that the Basic Bundled Offer (and its Monthly Recurring Charge, being \$12.00 in FY24) will apply on a pro-rated daily basis for each day on which an AVC with the relevant bandwidth profile is used as an input into an Access Seeker Product or Downstream Product which is a broadband service which includes a voice component and utilises 0.1 Mbps of TC-4 (PIR) or less of capacity and that, on other days, the Bundled TC-4 Offer with a bandwidth profile of 12 Mbps PIR (TC-4) which is not the Basic Bundled Offer (and its Monthly Recurring Charge, being \$24.40 in FY24) will apply on a pro-rated daily basis.
- ³ These are potential maximum information rates, not peak information rates. The AVC Data Transfer Rates for this Bundled TC-4 Offer were upgraded in May 2024 to the rates shown in the table (from the previous rates of up to 75 Mbps downlink and up to 10 Mbps uplink).
- ⁴ CVC TC-4 Inclusions will be adjusted on 1st July and 1st January of FY25 and FY26, in accordance with clause 2B.5 of the SAU. The SAU also provides for a single CVC inclusion adjustment in FY24, which will be relative to the CVC TC-4 Inclusions set out in Attachment E of the SAU and will take effect on 1 December 2023 – that adjustment is reflected in the CVC TC-4 Inclusions for FY24 stated in table 1.3 above, which are greater than those in the ‘Indicative Pricing Roadmap’ published by **nbn** in August 2023.
